Quiet Strip/Wear Strip

1

Quiet Strip eliminates the noise often associated with steel rollers running on steel rails. No more! Great for medical systems that require low friction, smooth and... QUIET linear motion.

2

Wear strip increases the life of our 300 series stainless linear rails. As the strip wears, clearance can be adjusted via the eccentric roller.

Materials:
Rail: 303 SS
Block: 300 SS
Rollers: 440C SS
Quiet Strip: UHMW
